

Professional Summary

Project leader with expertise in managing cross-functional teams delivering award-winning cybersecurity and AI/ML solutions. Successfully led end-to-end development of TrustTrace, LinuxAdmin, and VerifyIT projects. Global winner at Intel AI Challenge 2025. Skilled in agile methodologies, stakeholder management, and client relationships. Seeking project management roles leveraging technical acumen to drive complex technology initiatives.

Technical Skills

- **Programming Languages:** Python, C, HTML, CSS, JavaScript, Bash
- **Security Tools:** Kali Linux, BurpSuite, Wireshark, Nmap, Metasploit Framework, Ghidra, Wazuh, SubFinder, Shodan
- **Frameworks & Technologies:** Django, Flask, Bootstrap, Pandas, Numpy, CNN
- **Cybersecurity Skills:** Penetration Testing, Vulnerability Assessment, Governance Risk Compliance (GRC), Incident Detection and Response (IDR), SIEM, Security Auditing
- **Soft Skills:** Collaboration, Problem-Solving, Analytical Thinking, Communication, SDLC Management

Education

Shah and Anchor Kutchhi Engineering College(Pursuing)	
BTech in Cyber Security, CGPA: 7.7/10	11/2022 - 06/2026
Mithibai College, Junior College	
Higher Secondary Certificate (HSC), Percentage: 67%	03/2022
Utpal Sanghvi Global School	
Secondary School Certificate (SSC), Percentage: 88%	03/2020

Experience

Infrastructure and Security Intern	01/2026 - Present
Bimabajar	
• Managing infrastructure deployment and conducting VAPT to assess security threats and vulnerabilities.	
Cybersecurity Intern	10/2023 - 12/2025
CyberPeace Centre of Excellence (COE)	
• Enhanced cybersecurity awareness via digital safety workshops, reaching 200+ participants across multiple events	

Projects

TrustTrace Python, Bootstrap5, Django, ML	12/2023 - Present
• Developed multimedia deepfake detection platform supporting image, video, and audio analysis	
• Implemented ensemble ML models achieving 92% accuracy in identifying synthetic media manipulation	
• Deployed scalable web application serving 500+ users with real-time detection capabilities	
LinuxAdmin Bash, NumPy, Wazuh, SIEM	06/2024 - 12/2024
• Designed air-gapped Active Directory system for Linux environments with Windows compatibility	
• Implemented master-slave architecture with centralized monitoring and logging capabilities	
• Automated security event detection including port scanning, unauthorized access attempts, and privilege escalation	
VerifyIT Python, Flask, BERT, Ollama	12/2024 - Present
• Built fake news detection platform leveraging BERT transformers and Ollama ML models	
• Integrated multi-modal fact-checking supporting image reverse search, text analysis, and URL verification	
• Achieved 88% accuracy in misinformation classification across news articles and social media content	

Achievements & Certifications

Competition Wins & Recognition	[View Certificates]
• Winner, Intel Global AI Challenge 2025 (Global Level)	
• Winner, CyberChallenge 2025 (Delhi Police)	
• Winner, Tantravihar 2025 (Vidyalankar Institute of Technology)	
• Gold Trophy, CCQC (Quality Circle Forum of India)	
• CTF Participation: AIR 30 in Pentathon 2025, AIR 36 in DawgCTF 2025	

Publications & Patents	[View Documents]
• 9 Research Papers published in Scopus-indexed journals and IJST (2024)	
• 1 Published Patent (2024) and 2 Approved Patents in cybersecurity and AI domains	

Professional Certifications

- Comptia Security + SY 701 Certification
- Certified Network Security Practitioner (CNSP)
