

Summary

Project leader with expertise in managing cross-functional teams to deliver award-winning cybersecurity and AI/ML solutions like TrustTrace. Recognized as a Global Award Winner at the Intel AI Challenge 2025 and skilled in agile methodologies, problem solving and client relationships. Seeking pentesting and compliance roles to utilize my technical acumen in identifying security gaps and ensuring regulatory alignment.

Achievements & Certifications

Competition Wins & Recognition

- Winner, Intel Global AI Challenge 2025 (Global Level)
- Winner, CyberChallenge 2025 (Delhi Police)
- Runner up - U'LECTRO 2026 at MPSTME
- Gold Trophy, CCQC (Quality Circle Forum of India)
- CTF Participation: AIR 30 in Pentathon 2025, AIR 36 in DawgCTF 2025

[View Certificates]

Publications & Patents

- 9 Research Papers published in Scopus-indexed journals and IJST (2024)
- 1 Published Patent (2024) and 2 Approved Patents in cybersecurity and AI domains

[View Documents]

Professional Certifications (Click to view)

- Comptia Security + SY 701 Certification
- Certified Network Security Practitioner (CNSP)

LOR/LOA (Click to view)

- TrustTrace
- Linux Admin

Technical Skills

- Cybersecurity:** Penetration Testing, Vulnerability Assessment, Threat Hunting, IDR, SIEM, GRC, Security Auditing
- Tools:** Kali Linux, BurpSuite, Wireshark, Nmap, Metasploit, Ghidra, Wazuh, Shodan
- Specializations:** Application Security (OWASP Top 10), Cloud Security (AWS/Azure), Digital Forensics, Risk Assessment
- Soft Skills:** Problem-Solving, Analytical Thinking, Collaboration, Communication, SDLC Management

Projects

TrustTrace | Python, Bootstrap5, Django, ML

12/2023 - Present

- Developed multimedia deepfake detection platform supporting image, video, and audio analysis
- Implemented ensemble ML models achieving 92% accuracy in identifying synthetic media manipulation
- Deployed scalable web application serving 500+ users with real-time detection capabilities

LinuxAdmin | Bash, NumPy, Wazuh, SIEM

06/2024 - 12/2024

- Designed air-gapped Active Directory system for Linux environments with Windows compatibility
- Implemented master-slave architecture with centralized monitoring and logging capabilities
- Automated security event detection including port scanning, unauthorized access attempts, and privilege escalation

VerifyIT | Python, Flask, BERT, Ollama

12/2024 - Present

- Built fake news detection platform leveraging BERT transformers and Ollama ML models
- Integrated multi-modal fact-checking supporting image reverse search, text analysis, and URL verification
- Achieved 88% accuracy in misinformation classification across news articles and social media content

Experience

Infrastructure and Security Intern

01/2026 - 06/2026

Bimabajar

- Managing infrastructure deployment and conducting VAPT to assess security threats and vulnerabilities.

Cybersecurity Intern

10/2023 - 12/2025

CyberPeace Centre of Excellence (COE)

- Enhanced cybersecurity awareness via digital safety workshops, reaching 200+ participants across multiple events

Education

SAKEC | B.Tech in Cyber Security (Graduated) | CGPA: 8.22/10

11/2022 – 06/2026

Mithibai College, Junior College | HSC | Percentage: 67%

03/2022

Utpal Sanghvi Global School | SSC | Percentage: 88%

03/2020
